

INSIGHT REPORT

Amazon Retail Partners Dashboard

Prepared By: Aditya Kumar

Executive Summary

- This dashboard was created using Excel Pivot Tables, charts, slicers, and XLOOKUP.
- The analysis shows sales performance, delivery status, cancellation rate, and top selling products.
- North region gave the highest sales revenue.
- Smartphone was the highest selling product category.
- The dashboard also helped in identifying delivery and cancellation issues.

Key Insights

1. Highest Selling Product Category

Smartphone is the highest selling product category with total sales of 9644.

2. Region with Highest Cancellation Rate

North region has the highest cancellation rate at around 33.33%.

3. Orders Delivered Within 2 Days

About 11% orders were delivered within 2 days under fast delivery.

4. Highest Revenue Region

North region generated the highest revenue of 10491.

5. Delivery Status Analysis

Delivered Orders = 34%

In Transit Orders = 36%

Cancelled Orders = 30%

The cancellation percentage is high and needs improvement.

The screenshot shows an Excel spreadsheet with several data tables. The 'Total Sales Amount by Region' table lists sales for North, South, East, and West regions. The 'Average Delivery Time' table shows average delivery times for different product categories. The 'Count of Orders by Delivery Status' table shows the number of orders in different statuses. The 'Cancellation rate by region' table shows the cancellation rate for each region. The 'Sales amount for delivered orders only' table shows the sales amount for delivered orders.

The screenshot shows an Excel spreadsheet with a 'FINAL DASHBOARD' section. It includes a table for 'Top Selling Products' which lists the top 10 products by sales. The table also includes columns for product name, sales amount, and average delivery time. The 'Top Selling Products by Region' table shows the top 10 products by sales for each region. The 'Top Selling Products by Category' table shows the top 10 products by sales for each product category.

How XLOOKUP Helped

XLOOKUP was used to find and match data from different tables.

It helped in checking product sales, region details, and top selling products quickly and accurately.

Recommendations to Improve Delivery Performance

- Improve delivery service in North region.
- Reduce delays in orders that are still in transit.
- Increase fast delivery service for customers.
- Track delayed orders properly to reduce cancellations.

Actionable Business Suggestions

1. Focus More on Smartphone Sales

Increase offers and stock for smartphones because it has the highest sales.

2. Reduce Cancellation Rate

Work on better delivery management in regions with high cancellations.

3. Improve Fast Delivery

Increase the number of orders delivered within 2 days to improve customer satisfaction.
